Subject: Perfect solution

I fully support the amended solution proposed by Red Hat, Inc.:

http://www.redhat.com/about/presscenter/2001/press_usschools.html

If that solution is not accepted by the DOJ, the DOJ will have some serious questions to answer. Allowing Microsoft to give away a limited number of copies of it's software to schools simply hooks more users on it's software you found to be monopolistic. This amended agreement truly helps our children by providing many more computers and free, superior software for life! It also punishes Microsoft a bit more for their crimes by *not* continuing their monopoly via their "punishment".

Respectfully,
Kevin
